

Royal
Botanic
Gardens **Kew** | Endeavour

Seed formation and dispersal

Seeds are made and
then spread away
from the parent
plant

Royal
Botanic
Gardens **Kew** | Endeavour

Royal
Botanic
Gardens **Kew** | Endeavour

Germination

Seeds begin to
sprout

Royal
Botanic
Gardens **Kew** | Endeavour

Sprouting

The seedling (young plant) begins to grow. It begins with two “seed leaves”

Royal
Botanic
Gardens **Kew** | Endeavour

Growth

The plant is
bigger, with
adult leaves

Gardens **Kew** | Endeavour

Royal
Botanic
Gardens **Kew** | Endeavour

Pollination

Pollen is transferred
from one plant to
another, in this case
by a bee
